

*Toward a 21<sup>st</sup> Century Health System:  
The Contributions and Promise of Prepaid Group Practice*

Edited by Alain C. Enthoven and Laura A. Tollen  
San Francisco, Jossey-Bass, 2004

SELECTED REVIEWS AND ENDORSEMENTS

**REVIEWS**

---

**Health Affairs**

Volume 23, Number 4,  
Pg. 278, July/August 2004

“When Congress takes up health reform again after the November elections, this book will be a source of ideas that should appeal to even a deeply partisan House and Senate....This book should be required reading for every physician in the United States.”

- **Jim Cooper**, U.S. Rep., D-TN

---

**Journal of the American Medical Association (JAMA)**

Volume 292, Number 20,  
Pg. 2523, Nov. 24, 2004

“This edited volume should be included in any collection said to lay the groundwork for transforming the current health care delivery system in the United States to make it more responsive to the renewed demands for high quality while containing costs.”

- **Keith J. Mueller, PhD**, Univ. of Nebraska Medical Center

---

**New England Journal of Medicine**

Volume 351, Number 23,  
Pg. 2458, Dec. 2, 2004

“The individual essays...are written by some of the best-known names in national health policy and practice today....Collectively, these essays serve as a reminder of the growing chasm between health care finance and health care organizations and quality. Many of the essays are excellent, particularly for readers who seek a general overview of the subject.”

- **Sara Rosenbaum, J.D.**, George Washington University

---

**Health Services Journal (Britain)**

April 22, 2004

“A brief review cannot do justice to the range of issues explored in this volume. The bringing together of leading-edge analysts like Don Berwick, Hal Luft and David Eddy and the coverage of major themes such as technology assessment, use of IT, and pharmacy benefits can only give a flavor of the contents.... *Toward a 21<sup>st</sup> Century Health System* repays careful study.”

- **Chris Ham**, Dept. of Health (UK) Strategy Unit

---

**ENDORSEMENTS**

---

“This book is a particularly valuable read for students of medicine, health administration and health policy. Here they will learn about their parents’ irresponsible ways in health care, and how much better value might be wrung out of the health system for the truly ample resources Americans grant it.”

- **Uwe Reinhardt**, Professor of Political Economy, Princeton University

---

“Everyone who is affected by health care should read this book to understand that real world examples of effective systems do exist and offer promise to meet the challenge of 21st Century medicine. We need the ideas and examples presented so vividly here.”

- **Christine K. Cassel, MD**, President & CEO, American Board of Internal Medicine and ABIM Foundation
