Kaiser Permanente’s Participation in Medallion Medicaid

Who We Serve

More than 47,000 members are enrolled in the Medallion 4.0 Medicaid program under our partnership with Virginia Premier Health Plan. Member composition:

- 43% children
- 57% adults

Data current as of May 2022.

Service Area

Kaiser Permanente currently participates as a Medallion 4.0 Medicaid provider in 7 counties and in the 5 cities of Alexandria, Fairfax, Falls Church, Manassas, and Manassas Park and is a delegated subcontractor to Virginia Premier Health Plan to provide care on a capitated basis (meaning a fixed payment per member, per month).

Document updated August 2022.
**Telehealth**

Kaiser Permanente is a leader in virtual care. In response to the COVID-19 public health emergency, the average monthly usage of telehealth services (scheduled telephone and video visits) increased three-fold compared to pre-pandemic levels. Though they remain significantly greater than pre-pandemic, virtual visits have gradually declined since 2020 as more individuals transition back to in-person care. As of June 2022, Medicaid members in Virginia had a monthly average of 4,700 virtual visits in 2022, down from 5,200 in 2021 and 6,500 in 2020 (Apr - Dec).

**Behavioral Health Integration**

To support our members’ mental health and wellness, we offer primary care, specialty medical and behavioral health care, substance use disorder treatment, and emergency care for acute crises. We partner with community mental health and rehabilitation providers to execute on the state’s behavioral health integration efforts. Our integrated model allows care to start wherever the member appears for treatment and includes both mental health and substance use disorder services for children and adults.

**Social Health**

Kaiser Permanente is building a social health practice to elevate social health to the same level as physical and mental health. As part of our social health practice, we will routinely screen individuals for social factors influencing their health, link them to resources – both community-based programs and Kaiser Permanente-funded initiatives across several domains including food security, housing, financial wellbeing, digital equity, and social isolation. And we will consider members’ personal circumstances when creating care plans.

**Social Health Screening**

Kaiser Permanente is currently implementing and expanding universal social health screening across all markets using standard questionnaires. These standard questionnaires screen for social risks and needs related to financial strain, housing instability, food insecurity and transportation among other service areas. The technology to integrate these standard screening tools into our electronic health record system will enable access across care delivery settings in all Kaiser Permanente markets starting in late 2022. Our goal is to screen at least 70% of all Kaiser Permanente members annually by 2025. Our work to establish universal screening will improve members’ overall care experience, allow more members to be referred to community-based resources, and will create opportunities to tailor care plans to personal situations, and drive equity and quality outcomes.

**Thrive Local**

Thrive Local is foundational to Kaiser Permanente’s social health practice as a central program for connecting members and patients to community-based programs and services that can help with housing, healthy meals, childcare, transportation, and many other social factors affecting their health. At its core, Thrive Local is a technology platform that provides searchable, up-to-date information on a wide range of local community-based organizations, programs, and services – many that accept electronic referrals from us and provide real-time status updates, so we can track whether members receive the help they need. Thrive Local has rolled out in phases via a series of community network launches.

- Community networks: Kaiser Permanente, with Unite Us and other health care funding partners, created and expanded coordinated networks of health and social service providers working together to address people’s social needs in every community Kaiser Permanente serves across 8 U.S. markets. Nearly 5,000 community-based organizations providing over 7,000 programs currently participate in these networks.
• As we roll out the Unite Us platform for Kaiser Permanente care teams to help members with social needs, we’re also using it in additional ways to support members’ social health. We added an online community resource directory to our member portal, kp.org, and opened a dedicated phone line to help members receive support with social needs. The online community resource directory is available at kp.org/communityresources.

**Life Experience Campaign**
In partnership with the Public Good Projects, Kaiser Permanente launched a multifaceted health promotion and social marketing campaign for older members, their caregivers, and our communities to address social isolation and loneliness.

**Get Your Refund**
Kaiser Permanente is informing eligible members about resources available through GetYourRefund. Led by the Office of Community Health, these outreach campaigns are part of a strategy to support financial wellbeing, connect members to available benefits and social services, and increase the purchasing power of economically vulnerable members. As of June 2022, across Maryland and Virginia, over 53,000 members have been outreached via text with over 11,000 webpage views.

**Digital Equity/Affordable Connectivity Program**
Kaiser Permanente supports patients’ awareness and access to the Affordable Connectivity Program for increased broadband resources to leverage digital health tools that improve health outcomes.
